

HABIB

Full-Stack AI Engineer & Web Developer

About Me

Innovative Full-Stack AI Engineer specializing in Next.js, React, TypeScript, and modern web application architectures. Experienced in building end-to-end systems with neural AI integrations, real-time biometric security matrices, responsive GSAP animation frameworks, and scalable SQL backends.

Work Experience

ALPHA SECURITY

AI Biometric Authentication Matrix

Engineered a passwordless facial authentication platform using Next.js & TypeScript. Integrated neural face engines (FaceCheck & Yandex AI) with real-time liveness detection and Prisma ORM + PostgreSQL backend.

MATRIC AI STUDY PLANNER

Smart Academic Ecosystem

Built an AI-driven study planner with automated Punjab Board syllabus integration using Supabase SQL. Developed a 3-step interactive routine generator with real-time progress tracking APIs.

BASRA INTERIORS

Commercial Architectural Showcase

Designed a luxury architectural visualization platform featuring GSAP motion transitions, responsive grid layouts, and dynamic relational database structure for spatial product showcases.

Education

- [2022 - 2024] → MATRICULATION
- [2024 - 2026] → INTERMEDIATE (IT)
- [2024 - 2026] → FULL-STACK AI & WEB SYSTEMS (AUTONOMOUS TRACK)

Skills

Next.js & React.js
TypeScript & JavaScript
Tailwind CSS & GSAP Motion
Node.js & Python
PostgreSQL & Supabase SQL
Prisma ORM & REST APIs
Face-api.js & Neural AI Integration
